All Regional Directors/Directors (I/c)  
Medical Superintendents of ESIC Hospitals  
Deans of ESIC Medical Colleges

### **Review of the Aadhaar Implementation in ESI Corporation**

Pursuant to the approval for seeding the Aadhaar number in the IP database, guidelines have been issued from time to time . However, it has been observed that the regions have not been able to achieve the targets fixed for them. The performance to this effect is being monitored by the ESIC Hqrs and the Ministry. The shortfall in performance has been viewed seriously.

Multiple options for Aadhaar seeding have already been developed and made available to all the field offices. However, despite providing all necessary facilities, regular monitoring and instructions issued by Hqrs. office time to time and periodically reviewing the progress, Aadhaar Seeding work in various regions are not found satisfactory.

**To increase Aadhaar seeding and achieve the targets fixed, the following additional steps should be implemented:**

1. **Awareness Campaigns:** Conduct awareness campaigns to educate Employers/Employees about the importance of Aadhaar seeding and its benefits in accessing ESI services.
2. **Simplify the Process:** To make the Aadhaar seeding process self sustainable and easier, make Employers, IPs and beneficiaries aware how to do it on their own by following ways:-
  - a. Online Self-seeding by IP/dependents through ESIC-IP Portal
  - b. Through employer of IPs.
  - c. By visiting ESIC Branch Office.
  - d. By visiting the Kiosks established at Hospital/dispensary.
  - e. Through Face-recognition after installing ESIC Mobile Application (AAA+)
3. **Set targets:-** Region/Sub-Region should set a target for achieving 100% Aadhaar seeding of IPs and beneficiaries falling under their jurisdiction.

All Regional Directors/Directors (I/c)/Medical Superintendents/Deans are requested to make all efforts to achieve the target of Aadhar seeding of IPs and their dependents at the earliest.

This issues with the approval of Director General.
